SUMMARY

BRODA Seating is committed to improving the quality of life of the infirmed or elderly and the caregivers that take care of them, by providing safe, durable and comfortable seating and accessories.

BUSINESS SUMMARY:

Broda Seating, a North American manufacturer of long-term care positioning and mobility chairs, was founded in 1981 by David Brotherston. Broda Seating has become synonymous with unparalleled patient comfort, safety and durability. In 1981 Broda began its distribution throughout Eastern Canada and by the early 1990's, Broda was well established in the Canadian health care market. At this time, Broda began to focus on the US market and by 1997, had established a distribution network across North America. The first European distribution agreements were signed in 1997, in Japan in 1998 and in Australia in 2002. By our 30th anniversary, almost 100,000 Broda chairs had been sold around the world!

CAPABILITIES

Our products help:

- Provide comfort and pressure reduction/redistribution
- Provide mobility for active residents
- Improve safe patient handling
- Reduce staff injuries caused by transferring or repositioning patients
- Implement a "no lift" or "no fall" program in your facility
- Minimize maintenance and replacement costs of chairs

FACILITIES AND EQUIPMENT:

One hundred thousand feet of manufacturing and distribution area. We are committed to maintain the effectiveness of the quality management system in order to meet the needs of our customers and required regulations.

BRODA Seating strives to achieve zero defects, 100% on-time delivery, and total customer satisfaction through continuously improving processes, products and customer service.

EXPERTISE:

Every chair is manufactured and custom built in order to accommodate each patient's anatomical and treatment needs.

FDA Registered
Good Manufacturing Processes Compliant
